- How to utilize the latest in somatic theory.
- How to guide clients in learning how to receive.
- How to support trauma healing.
- How to develop your internal sensing into your most powerful tool.
- How to use massage as a practice to enhance your own self-development.

This training will not teach you new techniques. It will teach you how to *transform* your techniques, bringing your existing skill set into a new presence that will develop not what you do, but how you do it.
